Religious cosmology is an explanation of the origin, evolution, and eventual fate of the universe, from a religious perspective. This may include beliefs on origin in the form of a Creation Myth, subsequent evolution, current organizational form and nature, and eventual fate or destiny. There are various traditions in religion or religious mythology asserting how and why everything is the way it is and the significance of it all.

Religious Cosmology - The Spiritual Life

Theology plays a role in this Big-Bang description in a most peripheral way; it enters only in the choice of the subject matter. Cosmology has always appeared as a portion of the conceptualized physical world that is particularly fascinating to broad audiences and to theologians.

In this sense, the theological claim about divine creation as entailing the contingency of the world is apparently confirmed by the empirical evidence for the beginning of the universe in the Big Bang model. Hence, if we believe, for theological reasons, that God created the universe, then t=0 in Big Bang cosmology gives strong confirmation of that belief.

Dr Peter Bussey - 'Cosmology, how physics and theology meet'

While religion's record is mixed, perhaps it is better overall than the alternatives. My debate colleague, Mr. Wright, characterizes it this way: "The only openly atheist societies in history were socialist or national socialist, run by Lenin, Hitler, Stalin, Mao and Pol Pot and the other most atrocious monsters in history."
