Whether digital or old-school film, video is a series of still images that, when viewed in order at a certain speed, give the appearance of motion. Frame rate is the speed at which those images are shown, or how fast you “flip” through the book and it’s usually expressed as “frames per second,” or FPS.

Frame Rate: A Beginner's Guide | Blog | TechSmith

High-definition video (HDTV Video or HD video) is video of higher resolution and quality than standard-definition.While there is no standardized meaning for high-definition, generally any video image with considerably more than 480 vertical scan lines (North America) or 576 vertical lines (Europe) is considered high-definition. 480 scan lines is generally the minimum even though the majority ...

Video Quality: Video quality comes down to the resolution of the camera. The two most popular standards right now are 1080p full-HD and the future-proof 4K Ultra-HD. Both work great and deliver sharp, lifelike videos. Which one should you get? If you are looking for value, choose 1080p. If you are looking for the best image quality, pick 4K.
