Focus Structure In Generative Grammar

The notion of focus structure in this work refers to the distinction between categorical,thetic and identificational sentences. The central claim is that the syntactic representation of every sentence has to encode which of these types of focus structure is realized. This claim is discussed in great detail with respect to syntax, intonation and semantics within the framework of the Minimalist Program.

Focus in Generative Grammar. The topic of this book is the notion of 'focus' and its linguistic characterization. The main thesis is that focus has a uniform grammatical identification only as a syntactic element with – in English at least – a certain systematic phonological interpretation and – presumably universally – a range of semantic interpretations.

Focus in Generative Grammar | John Benjamins

After considering defining the location of prominence in a focused phrase in terms of constituent structure, the author argues that an argument structure approach to the focus phrase/prominence relation is more promising. This is then exemplified in analyses of cleft focus and constructional focus. [Studies in Generative Linguistic Analysis , 4] 1986. ix, 221 pp.

Focus in Generative Grammar | Michael Rochemont

This branch of linguistics, broadly known as Generative Grammar, is concerned with the formulation of explanatory formal accounts of linguistic phenomena with the ulterior goal of gaining insight into the properties of the 'language organ'. The series comprises high quality monographs and collected

volumes that address such issues.

The paper delves into the concept of transformational generative grammar (TG) with the intention of providing necessary information for students and teachers of English Language on the concept.

(PDF) Key Concepts in Transformational Generative Grammar

In linguistics, generative grammar is grammar (the set of language rules) that indicates the structure and interpretation of sentences that native speakers of a language accept as belonging to their language. Adopting the term generative from mathematics, linguist Noam Chomsky introduced the concept of generative grammar in the 1950s.

Description : According to Chomsky, to learn a language is to develop a grammar for it - a generative grammar which assigns a definite structure and a definite meaning to each of a definite set of sentences. This forms the speaker's linguistic competence, which represents a distinct faculty of the mind, called the faculty of language.
