Polar Coordinate Graph Paper

Polar graph paper, also known as polar coordinate paper, is a graph paper with concentric circles (with equal spacing between them) that are divided into small arcs. In plotting on this paper, one measures a radial distance from the pole (origin) and then rotates an angle of theta degrees from the polar axis (positive x axis). In polar coordinates, the point (r, θ) is described as being a certain distance (r) from the pole (origin) and at a certain angle (θ) from the polar axis (positive

In case you haven't been paying attention in class, polar graphs are like your typical Graph Paper Template and are used the same way: to create graphic projections of certain data. In the case of polar graphs, they help you plot out polar coordinates. Usually, you will be utilizing them to measure radius as a function of angle.

To graph polar coordinates, make a table with distance (r) and angles (θ) values. For example, if $R = 0$ and $\Theta = 0$, the coordinate is plotted at the center of the polar graph. If the next coordinate in this circular motion is $R = 6$ and $\Theta = \pi/6$ the coordinate is plotted at a radius of 6 to the right and a curved line is used to show the angle (Θ) of $\pi/6$.

Polar Coordinate Graph Paper 1. While graphing the points on any coordinate plane it is necessary to first of all understand the method as it is only done in the form of x, y . You must know that x axis is always in the horizontal direction that is it goes from left to right and the y axis is in vertical direction means it moves up and down.
