Probability is used to answer questions in the category of
Statistics. Probability is a basic statistic that gives numeric value
to the questions; Will a specific event occur? or How certain...

Statistics and probability? - Answers

Answer & Explanation Answer: A) $2/91$ Explanation: Let S be the
sample space. Then, $n(S) =$ number of ways of drawing 3 balls
out of 15 = $15 C 3 = 15 * 14 * 13 / 3 * 2 * 1 = 455$. Let $E =$ event
of getting all the 3 red balls. $n(E) = 5 C 3 = 5 * 4 * 2 * 1 = 10$. \Rightarrow
 $P(E) = n(E)/n(S) = 10/455 = 2/91$.

149+ Solved Probability Questions and Answers With Explanation

The correct answer is option A To find the probability of 3
students got an A on a test, multiple the probabilities of the 3
students. Probability of the first student = $5/30 = 1/6$ Probability
of the second student = $4/29$ Probability of the third st

that the probability they will know the answer to a question is
 0.5 , the probability that they will be able to eliminate one choice
is 0.25 , otherwise all 4 choices seem equally plausible. If they
know the answer they will get the question right. If not they have

to guess from the 3 or 4 choices.

Exam 1 Practice Questions I - MIT OpenCourseWare

To calculate a probability as a percentage, solve the problem as you normally would, then convert the answer into a percent. For example, if the number of desired outcomes divided by the number of possible events is .25, multiply the answer by 100 to get 25%.

4 Ways to Calculate Probability - wikiHow

Statistics isn't the easiest subject too unfortunately. This is because it involves a whole barrage of formulae not to mention applied math concepts that one has to remember. A simple mistake in a formula will obviously lead to an incorrect answer since statistics is a very precise subject and outcomes are known in advance.

Do My Statistics Homework With Statistics Homework Help ...

Statistics rarely give a simple Yes/No type answer to the question under analysis. Interpretation often comes down to the level of statistical significance applied to the numbers and often refers to the probability of a value accurately rejecting the null hypothesis (sometimes referred to as the p-value).
