Chords are built from scale degrees by stacking other scale tones of certain intervals apart. To be considered a chord you need at least three different tones. The most basic chord is called the triad(which means consisting of three). The first tone of the chord is called the root.

### Chord Construction Part 1 Learn How To Build Guitar Chords

To build the chords of a major key, you start on the tonic, which is C in this case, and add the note that is a 3rd interval up from the tonic and the note that is a 5th interval up from the tonic. It's simple counting. Starting at C, count down to 3, and you arrive at E, which is the second note in a C Major chord.

### Chord Progression Theory: A Guide for Guitar Players ...

Common Guitar Chord Progressions. In order to learn guitar chord progressions (instead of simply understanding the concept), you'll need to practice common progressions. Thankfully, there are several beginner progressions that can help you easily understand how they work. Many songs are created using very basic progressions.

Today we will focus only on Major and minor thirds, as those are what are used to build basic triads. A Major third is four half steps from the root, whereas a minor third is three half steps from the root. A properly stacked Major triad's foundation is built of a Major third, and stacked on top is a minor third.
